

Team meeting week 1:

- We discussed the basics of our website and how we'll go about its implementation
- Genesse will design the wireframes
- Mateusz will work on basic homepage design
- Chenghao will work on login & registration page
- Jennifer will work on the following other users feature and creating the tables associated with making that possible

Team meeting week 2:

- Pick up the pace and make sure to update project board and release notes
- Jennifer will work on the uploading photos feature and getting the photos to display and an unfollow feature
- Mateusz will work on the homepage now that the photos can be uploaded
- Chenghao will work on the google maps feature

Team meeting week 3:

- So our basic features work, but we need to work on UI & beautification of the site
 - Style the nav bar!
 - Jennifer - add styling to My Photos and Following pages
 - Mateusz - add styling to Home
- Genesse will work on the NASA photo of the day displaying

Last team meeting (week 4):

- Everything is complete, including the presentation slides!
- We rehearsed our presentation. It was ~12 minutes, including the demo
- Will finish the project report by Wednesday night
