# Notes

- we need to update the project board
- We need to make release notes (not for this week)
    - Next week we need release notes for week one and two by the end of the week
- Need project board and user stories
    - User description and user stories
    - Need to assign a person
    - Need different branches and then merge them at the end
- Every time you pull from main it should work
- Complete by week 4 anything that we accept
- Create a table for documentation
    - Commits and names of commits
    - Pick one commit from each person that is the most important commit per week
    - (not too important for April 13th week)
- Next week start with UI and database
- Complete functional features every week
