A list of updates you have made since the last meeting. This should be in the Milestone Submissions folder.

We have implemented a login and register page that handles all test cases.
- On the login page, If user enters invalid username (i.e a username that has not been registered yet), it redirects to the register page with message "Username does not exist, redirecting back to register page"

- If user enters valid username but incorrect password, it displays a message "Incorrect password"
- User must enter both username and password to login, or else it displays "Please enter both username and password." message

We have implemented the basic homepage layout with a carousel of photos

We have implemented a following page where users can enter other usernames to follow. The following page displays a list of usernames the user is currently following
